

Surveillance Services

- Up-to-the-minute aerial perspectives of a disaster scene for emergency responders.
- Nuclear Radiation, and Chemical Agent Detection (CAD) from tethered aerostats up to 499 ft.
- Overview of oil spills, forest fires, crash sites, crowds or disaster sites (day or night).
- Mobile command and control trailer with image processing, printing and basic Internet.
- 3D photo-realistic visualizations of proposed buildings or security-related infrastructure.
- Night vision and stealth surveillance from a bird's eye perspective.
- Time-lapse views of ports, dams reservoirs, nuclear power plants and public events.
- Deterrence to intruders or crowds with highly visible 'Security' surveillance aerostats.
- Portable and quickly deployed 11 meter mast for imaging or rapid antenna deployment.
